Change report

PRIMERGY Server

Instructions

This document contains basic product and configuration information that will enable you to configure your system via System-Architect.

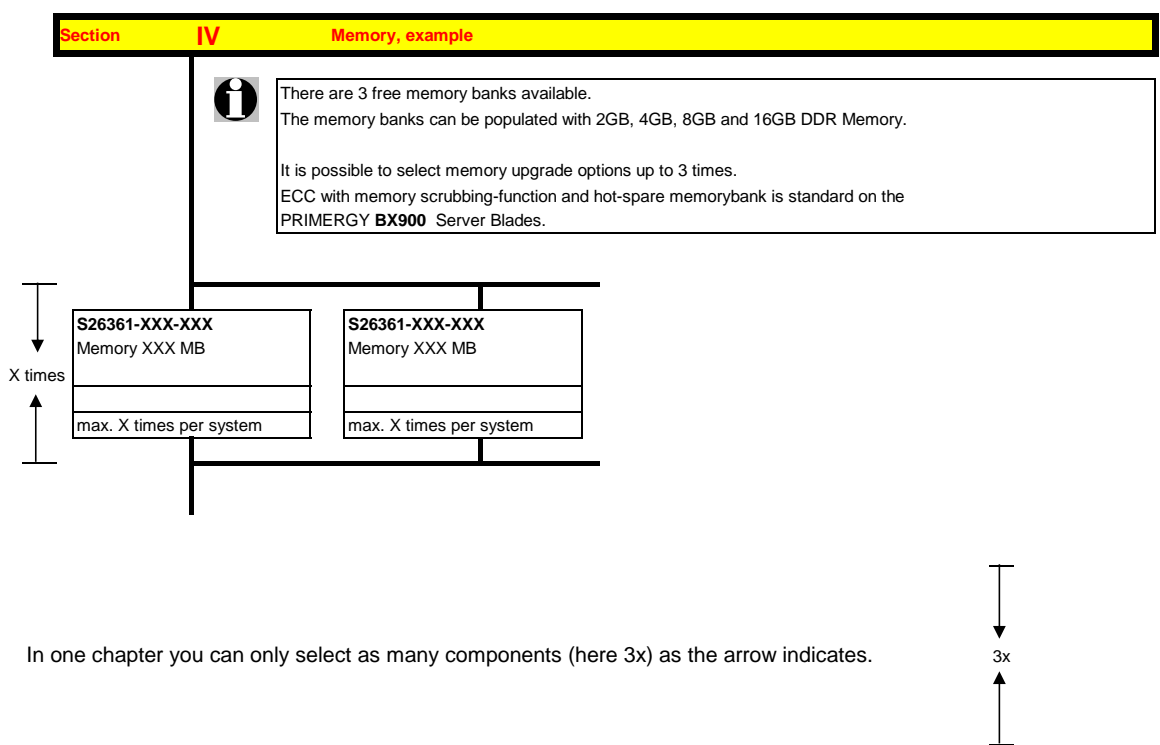

Only the tool "System-Arcitect" will ensure a fast and proper configuration of your PRIMERGY server or your complete PRIMERGY Rack system.

Please pay attention to the naming conventions: **BX900 S2** System unit 1st generation

You can configure your individual PRIMERGY server in order to adjust your specific requirements.

The System configurator is divided into several chapters that are identical to the current price list and PC-/ System-Architect.

Please follow the lines. If there is a junction, you can choose which way or component you would like to take. Go through the configurator by following the lines from the top to the bottom.

In one chapter you can only select as many components (here 3x) as the arrow indicates.

Please note that there are information symbols which indicate necessary information.

For further information see:

http://ts.fujitsu.com/products/standard_servers/index.html (internet)

https://partners.ts.fujitsu.com/com/order-supply/configurators/primergy_config/Pages/Currentconfigur (extranet)

Prices and availability see price list and PC-/ System-Architect
 Subject to change and errors excepted

Configuration diagram BX900 S2 System Unit

Extension slots front side

Extension slots rear side

Key:

-  Included in basic unit
-  Option

PSU slots may also be equipped with Rear Fan Modules
 (see next page for details on power and cooling)

Section System Unit BX900 S2

S26361-K1421-V300
 The System Unit BX900 S2 without PSU consists of:

- * 10U chassis including
- * Rack mounting kit suitable for
 - PRIMERGY 19" PRIMECENTER Rack, FJ new rack and 3rd party racks (e.g. Rittal)
 - 1 pair of carrier rails and 1 bracket for DC-Rack
- * Drives / bays / slots
 - 18 empty slots for 18 hot-plug Blades at front side.
 - 8 empty slots for Connection Blades at rear side
 - 3 empty slots for additional hot-plug power supplies at rear side
- * 1 hot-plug Management Blade
- * ServerView Local service Panel for Blades

External Interfaces:

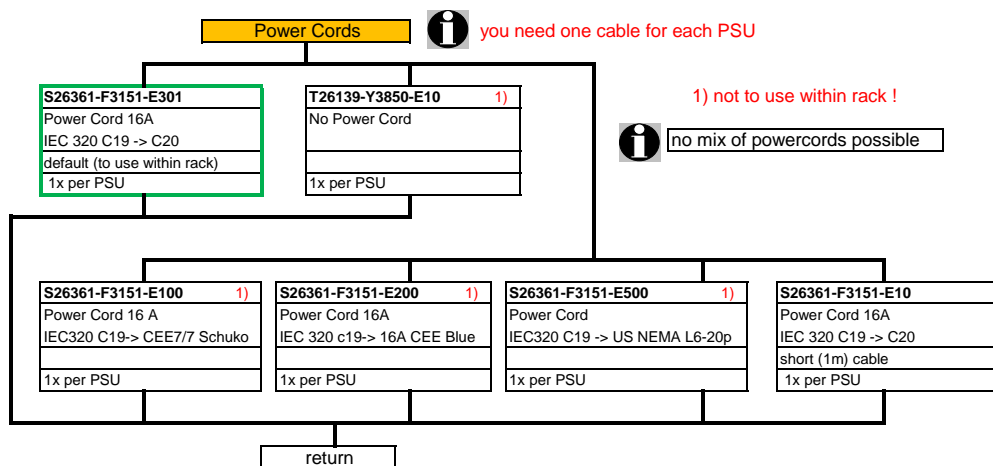

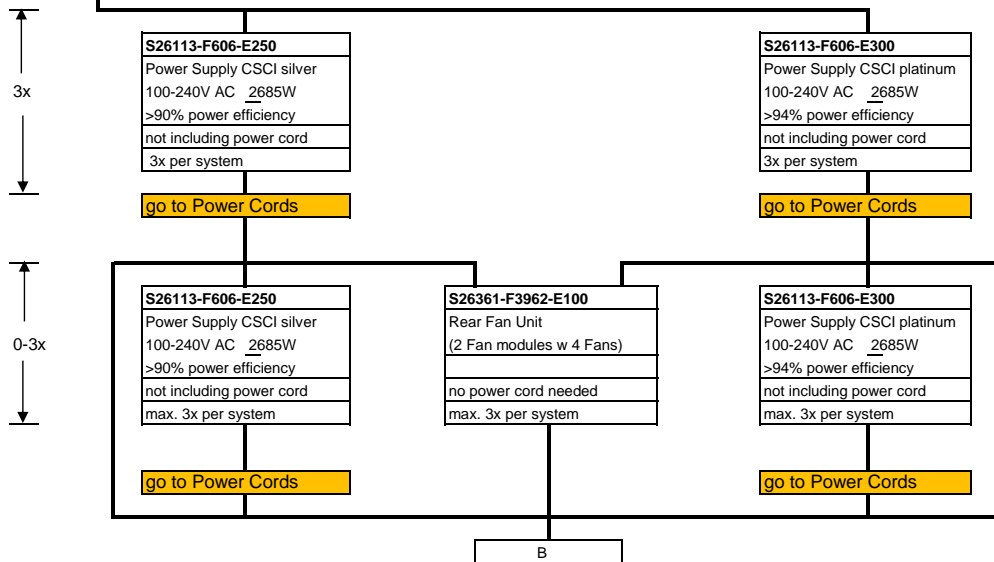

- 1x RS-232-C (serial, 9 pin) per Management Blade
- 2x 1Gb Ethernet per Management Blade
- 2x USB per Management Blade
- 1x VGA, 1x serial and 4x USB at front side of each Server Blade via special cable

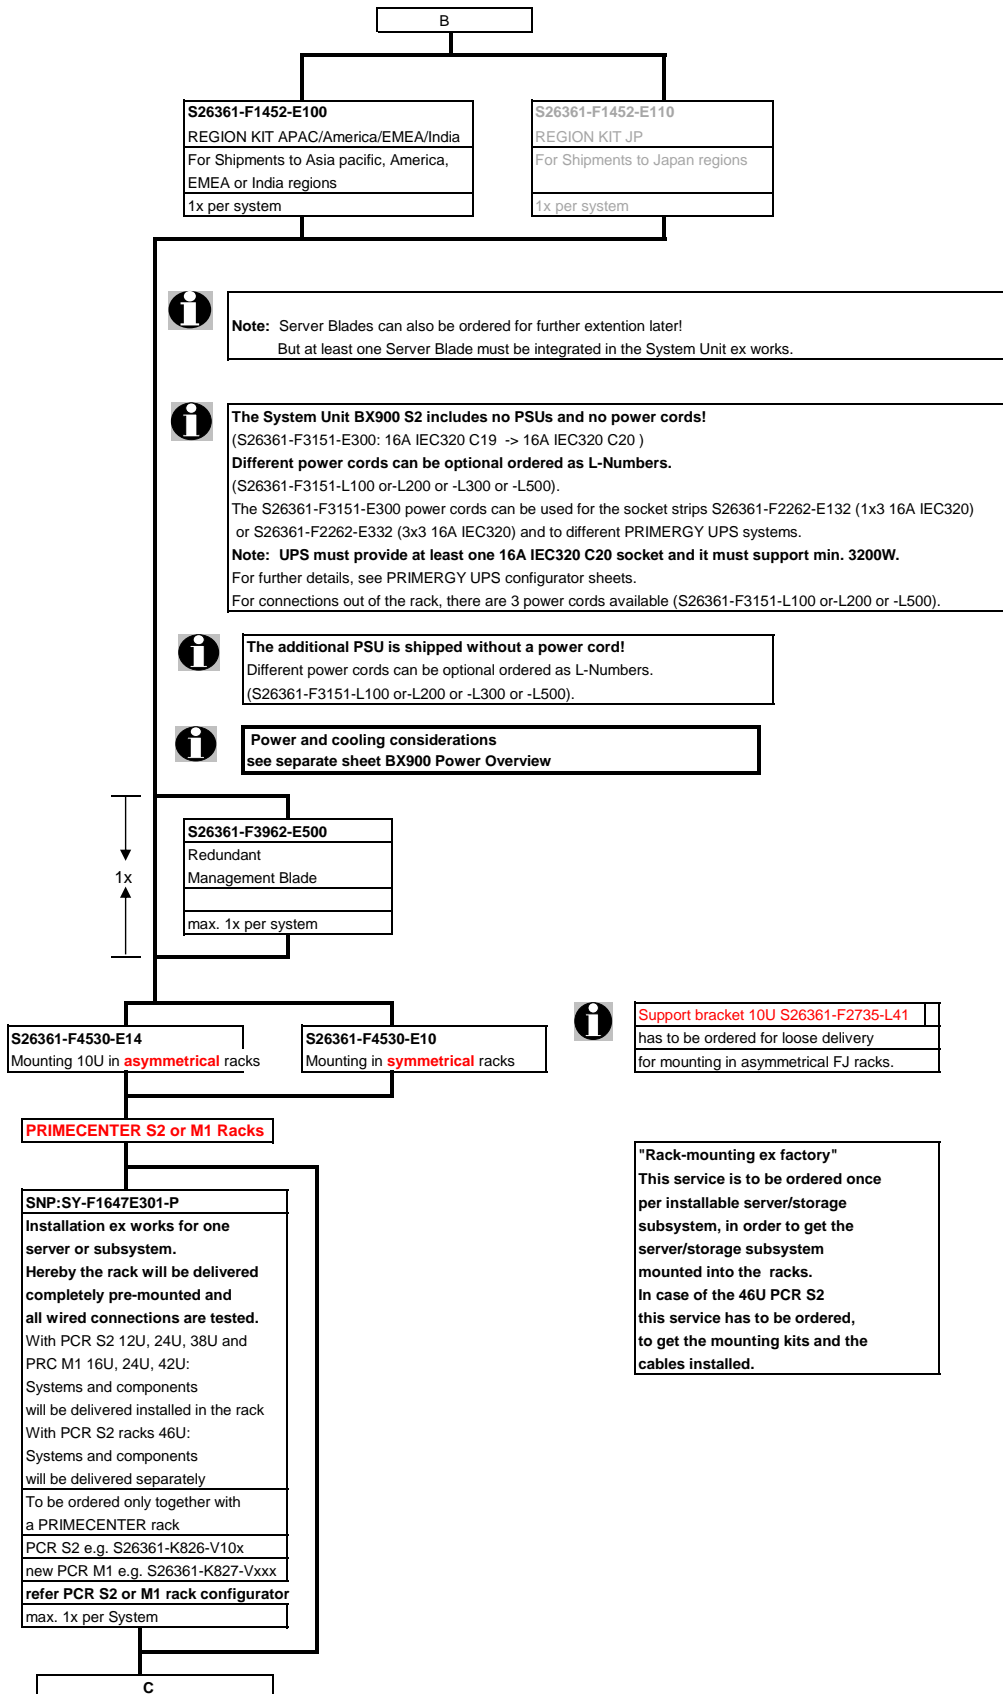

Cables (shipped with each System Unit):

- 1x special cable with 2x USB for external CD/FD and 1x VGA for Server Blade front side connection.

Software:

- ServerView Suite Software package incl. ServerStart, ServerBooks, Management Software and Updates

i **Note:** Server Blades can also be ordered for further extension later!
 But at least one Server Blade must be integrated in the System Unit ex works.

i **The System Unit BX900 S2 includes no PSUs and no power cords!**
 (S26361-F3151-E300: 16A IEC320 C19 -> 16A IEC320 C20)
Different power cords can be optional ordered as L-Numbers.
 (S26361-F3151-L100 or-L200 or -L300 or -L500).
 The S26361-F3151-E300 power cords can be used for the socket strips S26361-F2262-E132 (1x3 16A IEC320)
 or S26361-F2262-E332 (3x3 16A IEC320) and to different PRIMERGY UPS systems.
Note: UPS must provide at least one 16A IEC320 C20 socket and it must support min. 3200W.
 For further details, see PRIMERGY UPS configurator sheets.
 For connections out of the rack, there are 3 power cords available (S26361-F3151-L100 or-L200 or -L500).

i **The additional PSU is shipped without a power cord!**
 Different power cords can be optional ordered as L-Numbers.
 (S26361-F3151-L100 or-L200 or -L300 or -L500).

i **Power and cooling considerations**
 see separate sheet BX900 Power Overview

1x
 S26361-F3962-E500
 Redundant Management Blade
 max. 1x per system

S26361-F4530-E14
 Mounting 10U in **asymmetrical** racks

S26361-F4530-E10
 Mounting in **symmetrical** racks

i **Support bracket 10U S26361-F2735-L41**
 has to be ordered for loose delivery
 for mounting in asymmetrical FJ racks.

PRIMECENTER S2 or M1 Racks

SNP:SY-F1647E301-P
Installation ex works for one server or subsystem.
Hereby the rack will be delivered completely pre-mounted and all wired connections are tested.
 With PCR S2 12U, 24U, 38U and PRC M1 16U, 24U, 42U:
 Systems and components will be delivered installed in the rack
 With PCR S2 racks 46U:
 Systems and components will be delivered separately
 To be ordered only together with a PRIMECENTER rack
 PCR S2 e.g. S26361-K826-V10x
 new PCR M1 e.g. S26361-K827-Vxxx
refer PCR S2 or M1 rack configurator
 max. 1x per System

"Rack-mounting ex factory"
This service is to be ordered once per installable server/storage subsystem, in order to get the server/storage subsystem mounted into the racks.
In case of the 46U PCR S2 this service has to be ordered, to get the mounting kits and the cables installed.

C

For more configuration information see the separate Server Blade configurator at:
https://partners.ts.fujitsu.com/com/order-supply/configurators/primergy_config/current/Pages/default.aspx

Section III Storage Blades in System Unit BX900 S2

i All described Storage Blades can be inserted into the designated slots of the System Unit.
 For more configuration information see the separate Server Blade configurator at:
https://partners.ts.fujitsu.com/com/order-supply/configurators/primergy_config/current/Pages/default.aspx

max. 6x	S26361-K1292-V200	S26361-K1290-V200	S26361-K1383-V210	S26361-K1383-V220
	PY SX940 S1	PY SX910 S1	PY SX980 S1 JBOD Blade	PY SX980 S2 JBOD Blade
	Storage Blade Disk	Storage Blade Tape	up to 10x SAS HDD	up to 10x SAS HDD
	1x or 2x PCIe Controller up to 4x SAS/SATA HDD max. 6x per system unit	1x PCIe Controller 1x SAS LTO Drive max. 6x per system unit	max. 6x per system unit	redundant SAS paths max. 6x per system unit

i Due to EMI restrictions, for the US market only
 3x SX980 S1 or S2 can be installed in BX900

max. 2x	S26361-K1382-V202
	PY SX960 S1 Storage Blade Disk
	1x SAS RAID Controller up to 10x SAS/SATA HDD max. 2x per system unit

Q

Section II BX900 Power Overview

Configuration Overview

A BX900 chassis has 6 slots for power supplies (PSUs) or Fan Units (RFNs). Limiting factors for mounting blades are available power from PSUs but also cooling which is assured by PSUs or RFNs. As a result there are mounting rules to be followed for servers if less than 6 units (PSUs or RFNs) are used in a BX900 chassis. Also available PSU power has to be considered.

Power table BX900

PSU 2685 W / 100 V AC				PSU 2685 W / 230 V AC	
Number of installed		Max. number		Max. number	
PSU	Fan	Max. Dual Server Blades	PSU redundancy	Max. Dual Server Blades	PSU redundancy
3	0	7	3+0	7	3+0
	1			10	
	2			14	
	3			18	
4	0	10	4+0	10	3+1
	1			14	
	2			18	
5	0	16	5+0	14	3+2
	1			18	
6	0	18	5+1	18	3+3
	0		6+0	18	

E.g. 3+1 means there are 3 base PSUs and 1 redundant unit given.
 2nd column shows the number of additional Rear Fan Units (RFNs). They are needed to provide cooling to additional server blade slots.
 Finally there are further columns showing the different server blades. Here is shown their maximum count which can be operated with the PSU / RFN configuration given on the left.
 Not all configurations may make sense, recommended ones are highlighted green.

Shown here is a configuration with one kind of server blade, only, no mixed configuration.!

Example: A BX900 with 3 standard PSUs at 230VAC and one RFN can support a maximum of 10 BX920 servers.

Connection Blades:

Above tables are calculated with the assumption that 6 Connection Blades (50W each) are mounted

Remark:

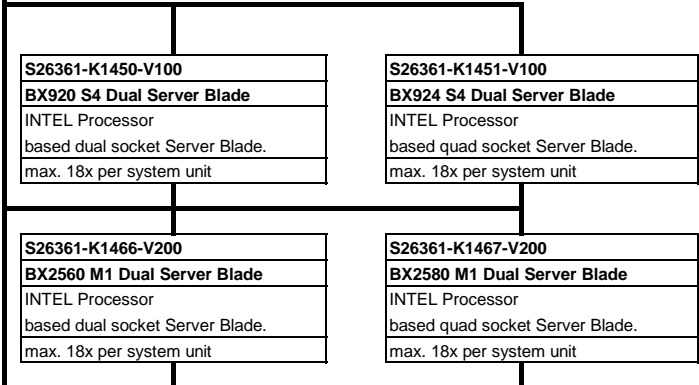

Basically mixed configurations of blades are possible. Because of the manifold of possible combinations extra calculations are required to show configuration limits.

C

Section Server Blades in System Unit BX900 S2

All described Server Blades can be mixed in on System Unit with the explained exceptions.
For more configuration information see the separate Server Blade configurator at:
https://partners.ts.fujitsu.com/com/order-supply/configurators/primergy_config/current/Pages/default.aspx
